DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Miyazaki et al (6,408,156).

Regarding claims 1 and 11, Miyazaki discloses an image forming apparatus (Fig. 4) for stacking and thus recording component color images on a recording medium using a plurality of image forming means, while transporting the recording medium down along a transport path, comprising:

pattern recording means for recording at least two primary patterns on the recording medium using one of the plurality of image forming means and also for recording an auxiliary pattern on the recording medium using another one of the plurality of image forming means; measurement means for measuring a displacement of the auxiliary pattern off a straight line passing through the primary patterns on the recording medium; and adjusting means for compensating for displacements of the

component color images stacked by the plurality of image forming means according to a measurement of the displacement of the auxiliary pattern (Figs. 7,14, column 24).

Allowable Subject Matter

3. Claims 2-10 and 12-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
